

listen, hard stone. listen hard, stone...

I was teaching a stone to talk...

1. I told it, don't be walked over
2. you show your true colours when you're under pressure
3. time will smooth out any rough edges
4. accept the shape you are, you are unique
5. dry stone wit can crack a smile
6. build your confidence like stepping stones
7. don't muddy the waters
8. skimming helps you project more
9. don't be afraid of being broken
10. being larger than life can make you look a little boulder

finally, even the smallest stone can be felt

ouch!
